

INTRODUCING

VISTA POINTE **BUILDER SERIES** MULTI-SLIDE DOORS

Vista Pointe is pleased to announce our **Builder Series** option for both pocketing and non-pocketing aluminum-clad and non-clad Multi-Slide (MS) door systems. While still offering many of the features you've come to expect with Vista Pointe systems, the **Builder Series** offers a significantly lower price point as compared to our traditional **Designer Series**.

Features of the **Builder Series** option include:

- Wood interior surfaces to match the panels.
- Clad exterior surfaces to match the panel color.
- For pocket systems, you still get a skirt to close off the pocket when the system is in the closed position.
- Standard FlushTrak™ sill (we still offer our popular WeatherTrak™ sill option).
- Detailed state-of-the-art shop drawings you've come to expect from Vista Pointe.
- Standard flush pull, flushbolt locks and edge-pulls in powder-coated simulated Oil Rubbed Bronze or Satin Nickel finish

What you don't get with **Builder Series** is our standard exterior trim pieces that are an exact architectural match to our manufacturing partners doors & windows that includes their accessory groove and nailing fin groove. We have learned that many customers do not need or are not interested in those features and are excited by the cost savings offered with the **Builder Series** design. The **Builder Series** can be configured with nailing fin grooves at no extra cost.

Price:

- Our **Builder Series** system can be fabricated using virtually any clad or non-clad wood door panels provided they are 1 3/4" thick. If you wish to supply the panels to Vista Pointe for fabrication, the price for the complete system is a simple \$/panel calculation. Once logged in to your dealer account, click on the Builder Series Quick Price Tool, enter your system information and your pricing will automatically populate.
- Our WeatherTrak™ sill option is available for **Builder Series** as well. WeatherTrak™ includes the aluminum between-track infills and the exterior transition nose piece. Select this as an option in the Quick Price tool and your price is automatically adjusted.
- If you prefer that we supply a turnkey system in either Andersen, Sierra Pacific or Windsor aluminum clad panels, please complete the quote request form and email it to us for pricing.

If using the Quick Price Tool, everything is included with the exception of the actual shipping cost to get the system(s) to you desired location. At your request, we will provide you a shipping quote as well.

If you do request a quote, please indicate if you wish a quote on our standard (**Designer Series**) design or the **Builder Series** program and whether or not you will supply the required door panels.

Contact us for more information or if you have any questions.
